SKILLS

- Python Backend Development
- AI Agents & Agentic Bots
- AI Integrations
- FlutterFlow
- Bubble
- n8n Automation
- Firebase
- Web Development
- Database Management
- API Integration
- Cloud Functions
- E-commerce Development
- Prototyping & MVP Development
- Version Control (Git)
- Deployment & DevOps
- IoT Development
- Project Management
- Workflow Optimization
- Client Communication

ABDUL SAMAD

PYTHON BACKEND DEVELOPER | AI & AUTOMATION SPECIALIST | 9+ YEARS IN SOFTWARE INDUSTRY & STARTUP GROWTH

PROFILE

I am a self-driven software engineer with 9+ years of experience building backend systems, AI-powered solutions, and full-stack applications. I specialize in Python backend development, AI agents, and agentic bot architectures. I founded Digilog Softwares, where I led projects, managed teams, and delivered high-quality web, mobile, and automation solutions. Currently building AI-driven products and scalable backend systems at Droidor.

WORK EXPERIENCE

Droidor

NOV 2025 - PRESENT

Senior Software Engineer

- Building AI-powered products and scalable Python backend systems, including LLM pipelines, agentic bots, and data processing services.
- Developing and maintaining backend microservices, APIs, and automation workflows for AI-driven applications.
- Implementing AI agent architectures and chat-mode agentic systems for product intelligence and customer engagement.

Digilog Softwares

SEP 2024 - SEP 2025

Founder & Software Engineer

- Founded and grew Digilog Softwares, overseeing operations, project management, client communication, and financial administration.
- Led and mentored developers as Project Lead, ensuring timely, high-quality deliverables while building a portfolio of web, mobile, AI, automation, eCommerce, and IoT solutions.
- Directed AI and workflow automation initiatives, managed digital presence, and drove business development by acquiring clients and closing leads.

Alt Ventures

JULY 2021 - SEP 2023

Senior Software Developer

- Built and scaled web and mobile apps using Bubble and FlutterFlow, delivering prototypes and production apps for Jiye, Creato, and DealCart.
- Developed backend workflows, cloud functions, APIs, analytics, and payment systems, while deploying and maintaining Play Store apps.
- Collaborated with stakeholders, provided hands-on technical support, and streamlined internal operations including accounts and subscriptions.

Digilog Electronics

JAN 2018 - DEC 2020

Senior System Software Engineer

- Managed Linux servers and deployed applications with focus on performance and security.
- Developed custom solutions using PHP, JavaScript, HTML/CSS, and MySQL for eCommerce (Shopify, WordPress).
- Automated workflows using VBA and Google Apps Script for business process optimization.
- Led small-scale internal projects, bridging software, systems, and automation.
